HIGH-VOLUME

THE ROTATOR SERIES

Experience authentic traditional quality that is "Italian Inspired" but manufactured in the U.S. Marra Forni brick ovens are the combination of true artisan workmanship and modern American manufacturing technology, and design innovation. Each oven is hand-made, brick-by-brick, using proprietary materials and the same time proven techniques that the traditional Italian brick masons have used for generations.

The Rotator is a high-production cooking solution featuring a rotating cooking deck that automates production consistency while minimizing operator skill set requirement. Available in four model sizes, these ovens are available in multiple solid fuel configurations and are designed to maximize efficiency, streamline food production, and provide consistency in cooking results. Known best for Pizza, the brick ovens are designed to support a variety of cuisines and cooking applications. Functional art for the front of the house, or built-into a wall or other structure, each oven is completely customizable.

Marra Forni really knows how to bring Italian hospitality to food-service equipment.”

- **Stephen LoPane, Executive Chef**
FLIK Hospitality Group

MARRASTONE

MarraStone is at the heart of every Marra Forni Brick Oven. Imported from the Naples Region of Italy, this proprietary brick formulation is the result of years of research and investment. Composed of volcanic material content, MarraStone is a highly porous refractory brick designed to accept, retain and give up heat readily resulting in greater thermal mass retention when cooking in the oven and consistently high performance and energy efficiency.

Our design and manufacturing process are the same as those used by Italian brick masons thousands of years ago . . . made by hand, brick-by-brick. Quality doesn't compromise!

ENCLOSED FACADE

The Rotator Series Brick Oven is customizable to allow the oven to be designed into an enclosed wall or fabricated structure to save space in the service area or for a completely unique customer facing experience. This design variation allows for flush mounting of the oven facade to the wall or surface structure with the remainder of the oven hidden from view behind the solid enclosure. Structural considerations are required for oven area ventilation and service access.

PASS-THRU DESIGN

Available on select ovens in the Rotator Series, the unique Pass-Thru configuration provides a functional bridge between back and front of house operations. As dining space evolves and challenges with labor distribution become more prevalent, the “Due Bocche” (Double Mouth) oven allows food production from one side of the oven and service from the other. Many applications include kitchen to restaurant, kitchen to bar, restaurant service to patio or grill service areas, making the ovens more functional to service a variety of customer dining spaces.

PIZZA

CAPACITIES

MODEL	RT90	RT110	RT130	RT150
COOKING DECK (cm Diameter)	90	110	130	150

WE ARE AT YOUR **SERVICE**

We are at your service – our HIGHLY experienced sales, customer service and national technical support and service network are available to provide ONE-ON-ONE advice, training and support to guide you through your Marra Forni oven solution purchase, and to then assist you with the successful operation and ongoing maintenance, service and support of your investment. All Marra Forni products include our standard Manufacturer's warranty.

PIZZA UNIVERSITY

At Pizza University, our award winning and industry recognized instructors provide our students with a hands-on pizza experience. Featured coursework provides guidance to restaurant operators, caterers, enthusiasts and aspiring pizzaioli that aid in the development of skills and understanding of pizza making through industry best practices. Students will learn about pizza history, dough chemistry and handling techniques, equipment, and principles for a successful business enterprise.

DIRECT VENTING SOLUTIONS

Our dedicated Venting Specialists will work with your architects, consultants or contractors to identify the best solution for your duct layout. You'll have peace of mind knowing that our system has all the UL Listings, so you won't have to worry about running into problems with the inspection process. Our gas oven models can be upgraded to include an exhaust fan interlock. This means that your exhaust fan will automatically turn on/off with your oven, and that the speed of the fan can be adjusted from the oven's touch screen.
